

**A LOW-CARBON DEVELOPMENT STRATEGY**

*Transforming Guyana's Economy While Combating Climate Change*

**DRAFT REPORT**

**REGION 4**

**NATIONAL TOSHAOS COUNCIL MEETING**

**30<sup>th</sup> July, 2009  
National Conference Centre**

## **Introduction**

At the launch of the Low Carbon Development Strategy (LCDS), on Monday 8<sup>th</sup> June, 2009, details of the consultation process were communicated to all stakeholders and a timeline of June to September, 2009 was outlined for this purpose. The future development of the LCDS was outlined with a clear, inclusive and transparent approach taken to sub-national consultations aimed at sensitizing the nation on the various aspects, implications and requirements of the Strategy and to receive feedback.

At the outset it was outlined that the long term success of the Low Carbon Development Strategy is dependent on the broad based, inclusive domestic support. Implementing the LCDS represents a transformation of Guyana's economy and, therefore, receiving support for the LCDS from the people of Guyana and their representatives is planned to be done at a pace which enables the commitment of Guyana's international partners to be made visible to the people of Guyana and, in turn, to allow Guyana to demonstrate its commitment to international partners.

Guyana's Amerindians have jurisdiction over the forest in all their own titled lands. As such, the current form of the Strategy only includes Guyana's State Forest Estate, and excludes forest lands under Amerindian jurisdiction. This is in accordance with the Government's commitment to only include lands under Amerindian jurisdiction after communities have engaged in appropriate consultation to decide whether they wish their lands to be included.

In accordance with the Amerindian Act and international norms, a series of consultations have been planned to enable the participation of communities. The sub national consultations were held between 19<sup>th</sup> June and 15<sup>th</sup> July, 2009 in all Regions except regions 4 and 5.

His Excellency President Bharrat Jagdeo indicated at the national launch of the LCDS on the 8<sup>th</sup> June, 2009 that he will have further discussions with all Toshias at the National Toshias Council Meeting in July. In keeping with his promise President Bharrat Jagdeo made a presentation and gave updates on the Sub National consultations held throughout Guyana.

After the presentation all Toshias had an opportunity to express the views of their communities relating to the Low Carbon Development Strategy. The complete list of representatives from the different communities present at the council meeting is listed in Appendix B and the feedback and comments are detailed in Appendix A. Some communities provided written statements of support for the LCDS and the letters are captured in Appendix C.

This report captures the discussion of the session, the key issues identified and suggestions and recommendations emanating from the discussions with the Toshias.

## A LOW-CARBON DEVELOPMENT STRATEGY

### *Transforming Guyana's Economy While Combating Climate Change*

#### *PROGRAMME*

9:30	Welcome	-	Chairperson (Norman Whitaker)
9:45	Presentation	-	His Excellency President Bharrat Jagdeo
10:30	Youth Presentation	-	Bina Hill Institute Youth Forum Participant (Bertie Xavier)
10:45	Open Discussion	-	Toshaos, Senior Councilors and Councilors
11:30	Brief overview of communication in the Hinterland –		Joe Singh
11:45	Open Discussion Continued		
12:30	Lunch	-	
13:30	Open Discussion Continued		
16:00	Close of LCDS session		

## **National Tshaos Council Meeting**

The presenter for this Session was His Excellency President Bharrat Jagdeo

The members of the discussion panel were:

- Hon. Minister of Amerindian Affairs, Pauline Sukhai,
- Hon. Minister of Home Affairs, Clement Rohee
- Chairman of the National Climate Committee, Mr. Shyam Nokta,
- Guyana Forestry Commission representative, Mr. James Sings,
- Guyana Geology and Mines Commission representative, William Wolford
- Attorney at Law and member of the Consultation team, Mr. David James,
- Retired Major General and member of the Consultation team, Joe Singh,
- Representative of the National Amerindian Action Movement, Mr. Ashton Simon
- Representative of TAAMOG, Mr. Peter Persaud
- IIED representatives, Ms. Vanda Radzik and Ms. Joclyn Dow

## **Main Issues**

1. It was noted that the demarcation process, including demarcation of proposed extension areas, is important to be addressed if land concerns are to be taken on board in the context of the LCDS.
2. The slow responses from MOAA after application for land titles are submitted.
3. An issue was raised as to how untitled lands and intended areas for extension will be treated in the Strategy.
4. Valuing the Forest: Concern about if the calculations for receiving money from the LCDS will be the same on Communal Forest and State Forest
5. Can the LCDS be apart of the primary curriculum?
6. Will an indigenous bank be needed for money received?

## **Suggestions and Recommendations**

1. It was recommended that community leaders need to spend more time understanding and explaining the strategy to villagers.
2. It was recommended that the LCDS should also be translated in local Amerindian languages and there should also have a simplified version.
3. Reforestation of forested lands should also be considered e.g. using crab wood where benefits can be derived from the wood and fruits.

## Minutes of the National Toshias Council Meeting for Low Carbon Development Strategy

**Region: 4**

**Location: National Conference Centre**

**Date: 2009/07/30**

No	Comments/ Questions	Response (H.E. President Bharrat Jagdeo, Minister Sukhai)
1	<ol style="list-style-type: none"> <li>1. Disappointed that one of the Amerindian NGO's was unwilling to participate in the LCDS discussions</li> <li>2. Job opportunities is a major problem in the hinterland</li> <li>3. What are the benefits for opting in</li> <li>4. There are no clear guidelines for opting in</li> <li>5. What are the new opportunities for the intermediate savannahs</li> </ol>	<ol style="list-style-type: none"> <li>1. The guidelines will become more clearly defined after the meeting in December. Several guidelines for forest are being considered including GFC standards, No break in canopy or the FAO sustainable extraction rates.</li> <li>2. The state will fund the transformation of communities e.g. Information technology, bee hiving and large scale farming as done in Mainstay with their pineapples.</li> </ol>
2	<ol style="list-style-type: none"> <li>1. A letter was submitted expressing support for the LCDS (see Appendix C -1)</li> </ol>	<ol style="list-style-type: none"> <li>1. Support was noted</li> </ol>
3	<ol style="list-style-type: none"> <li>1. Apologized for not keeping a community meeting on the LCDS.</li> <li>2. He indicated that he is still learning about the LCDS and will host a meeting with his community soon</li> <li>3. What will happen to people who have mining concessions within Amerindian reservations?               <ol style="list-style-type: none"> <li>a. Will money go to them</li> <li>b. Will their mining concession be revoked?</li> </ol> </li> </ol>	<ol style="list-style-type: none"> <li>1. The Amerindian reservation has all the rights to the land.</li> <li>2. This matter has been discussed on Monday and a team from GGMC will be visiting your village on Monday to assess the situation and provide a report.</li> </ol>
4	<ol style="list-style-type: none"> <li>1. How can the entire reservation belong to the village when on the map there is the clause on the map indicating "save and except".</li> <li>2. If we opt in will our rights be taken away and the community will be governed by the NDC</li> </ol>	<ol style="list-style-type: none"> <li>1. Absolute grants given in colonial times with structure and villages with roadways and waterways passing through them will have save and except on the maps because no community owns the waterways and roadways.</li> <li>2. Nothing changes at the community level; no NDC will take over the community. The elections of Toshias have been working well over the past years and this will continue.</li> </ol>
5	<ol style="list-style-type: none"> <li>1. He has encouraged his community members to also focus on extracting other resources from the reservation e.g. sand mining, wild fruits such as cocrite and Ite Palm</li> <li>2. Can logging continue since the community is mainly a logging community</li> </ol>	<ol style="list-style-type: none"> <li>1. Logging can continue one it is done in a sustainable manner.</li> </ol>

6	1. Support for the LCDS was expressed via letter submitted (see Appendix C – 2)	1. Support for the strategy was noted
7	1. Support for the LCDS was expressed and a letter was submitted to this regard (see Appendix C - 3)	1. Support for the LCDS was noted
8	1. How will the benefits be share especially for communities with savannah lands	1. There will be government intervention however; Amerindian communities and especially the National Toshao Council will have to decide what mechanism will be in place to disburse the funds.
9	1. The main language in the village is Wapishana so most persons don't understand the LCDS. 2. More time is needed before opting in.	1. No commitment is expected now from any community. 2. The documents are currently being translated into five different languages including Wapishana
10	1. The community does not have a title and the application was submitted since 2007 and 2009. 2. Road should be built soon since it is very difficult to come out with bicycle 3. An ATV should be supplied to the community 4. Support for the LCDS was expressed	1. The MOAA will be in contact with all communities that have made applications.
11	1. This is her third time attending a meeting on the LCDS. 2. At the last consultation with GGMC a community member asked what is REDD and the officers did not know what REDD was. I had to explain for my people. 3. At the last meeting I translated most of the presentation into my language and my name was not in the newspapers while other person names were in the papers. 4. There are many big words in the LCDS and I can't always explain them to my people hence we need more time and explanation.	1. There is no rush for communities to opt in at this point
12	1. Don't have major forested areas but supports the LCDS for our future generations. 2. Can the LCDS be apart of the primary curriculum?	1. Support for the strategy was noted
13	1. What are the obligations for the strategy 2. Can the positive and negative aspects of the strategy be outlined 3. What about extensions and demarcations of lands	1. Some of the obligations are: a. If we receive money for the forest that are pledged then logging must be done sustainably and we have to ensure we protect the forest 2. The positive and the negative include: a. <b>Positive:</b> Now we have the forest and we are not

		<p>receiving much money from it but the strategy will provide an opportunity to earn much more from the forest.</p> <p>b. <b>Negative:</b> Shifting cultivation may have to stop and move to more permanent agriculture</p> <p>c. The strategy may never come off the ground</p> <p>3. Extensions and demarcations are expected to accelerate with funds received from the LCDS.</p>
14	1. I am interested in having one portion of forested land for agricultural purpose and the other part will be left for the LCDS.	1. Currently the MOAA have agricultural experts conducting projects in region one where communities can benefit from.
15	<p>1. There is need for capacity building for agricultural development as a means of food security</p> <p>2. How will the carbon market (buying and selling) function</p>	<p>1. Carbon market can arrive from bilateral or multinational funds</p> <p>2. There is currently US \$100 Billion in the carbon market in Europe. If standing forests becomes apart of the Copenhagen agreement then Guyana can start trading carbon</p>
16	1. Support for the LCDS was expressed	1. Support was noted
17	<p>1. If the big countries want us to conserve our forest then they have to pay us.</p> <p>2. Support for the LCDS was expressed.</p>	1. Support was noted
18	1. Ninety percent (90%) off the people support the LCDS.	1. Support was noted
19	<p>1. There are two resorts in the village and had four years experience in eco-tourism</p> <p>2. The villagers say that the Toshao should make the right decision and support the LCDS initiative</p>	1. Support was noted
20	<p>1. A general meeting with villagers was done to discuss the LCDS.</p> <p>2. A survey of the village was done</p> <p>3. There are problems with Birth Certificates</p>	1. This problem will be rectified today since the persons from Guyana Post Office will be here to take all the details pertaining to Birth Certificates
21	<p>1. The LCDS was only received one day before the consultation in Kamarang</p> <p>2. More time will be need to learn about the strategy</p> <p>3. Untitled areas are covered mainly with savannah</p>	<p>1. Communities can decide not to opt in</p> <p>2. The OCC will help to in the dissemination of information about the LCDS</p>
22	<p>1. At first I did not understand the strategy but after explanation I fully support the LCDS.</p> <p>2. A Letter to this effect was also submitted (See Appendix C – 4).</p>	1. Support for the strategy was noted

23	<ol style="list-style-type: none"> <li>1. I am aware of the effects of climate change but more information about the LCDS is required</li> <li>2. Glad the president give the communities the opportunity to participate in the consultations</li> </ol>	<ol style="list-style-type: none"> <li>1. Information about the LCDS will continue to be disseminated by the Office of Climate Change.</li> </ol>
24	<ol style="list-style-type: none"> <li>1. Definition for forest is need in this regard because there is forest in the savannah lands</li> <li>2. Concerns about illegal mining by Brazilians in the country and gold not being declared.</li> <li>3. Consideration of relocating of Forest area so it can be used as collateral</li> </ol>	<ol style="list-style-type: none"> <li>1. I'm unsure if forest in savannah lands will be considered for benefits under the strategy.</li> <li>2. Illegal Brazilians should comply with local laws</li> <li>3. Most Brazilians are working on Guyanese mining claims</li> <li>4. When you have communal land it cannot be used as collateral because it is owned by the village</li> </ol>
25	<ol style="list-style-type: none"> <li>1. Will the upper Mazaruni benefit from the hydro project</li> <li>2. We want the law suit to be processed faster since we are interested in demarcation</li> </ol>	<ol style="list-style-type: none"> <li>1. Cheaper hydro can earn more revenue and solar can be sent to the hinterland area where hydro is not accessible.</li> </ol>
26	<ol style="list-style-type: none"> <li>1. Fully support the LCDS</li> <li>2. Each councilor will go house to house to share on the LCDS</li> <li>3. Agriculture, eco-tourism, housing, flora and fauna projects are on stream</li> </ol>	<ol style="list-style-type: none"> <li>1. Support for the strategy was noted</li> </ol>
27	<ol style="list-style-type: none"> <li>1. The community plans to get on board with ecotourism and joinery</li> </ol>	
28	<ol style="list-style-type: none"> <li>1. Support the LCDS but will wait and share with the village upon return</li> <li>2. Land title is demarcated but no legal document has been received. When will the documents be received?</li> </ol>	<ol style="list-style-type: none"> <li>1. Today, at the end of today's proceedings the necessary documents will be distributed to several communities.</li> </ol>
29	<ol style="list-style-type: none"> <li>1. Our community have refused to allow large logging companies like Barama and Jailing from entering our village to conduct logging</li> <li>2. Support for the LCDS was expressed</li> </ol>	<ol style="list-style-type: none"> <li>1. Support for the strategy was noted</li> </ol>
30	<ol style="list-style-type: none"> <li>1. Support for the LCDS was expressed</li> <li>2. Land demarcation is important to know how much forest is available</li> <li>3. Money is not all but what our children will have in the next ten (10) years is</li> <li>4. Would there be pressuring policies to apply to communities if they opt in or not.</li> </ol>	<ol style="list-style-type: none"> <li>1. No pressure will be applied to communities.</li> <li>2. All traditional activities can continue with the LCDS.</li> </ol>
31	<ol style="list-style-type: none"> <li>1. Support for the LCDS was expressed</li> </ol>	<ol style="list-style-type: none"> <li>1. Support for the strategy was noted</li> </ol>

32	1. Support for the LCDS was expressed	1. Support for the strategy was noted
33	1. Was out of the conference room at the time his name was called to ask questions on LCDS	
34	1. REDD and R Plan is insulting o the indigenous intelligence 2. The LCDS should be simplified 3. What are the obligations for LCDS for logging and mining (FAQ #10) 4. What are the standards that communities will have to strictly comply with as outlined in (FAQ # 5)	1. This suggestion is noted 2. The obligations for the LCDS will be consistent to national rules and regulations e.g. Code of Practice for Forestry.
35	1. Requesting a result on titled land. The application was submitted on 30 <sup>th</sup> February, 2007 and 23 <sup>rd</sup> October, 2007. 2. The community have over 300 persons and 99.9% Amerindians 3. When will titles be granted	1. The Ministry of Amerindian Affairs will be in close communication with all communities that are eligible for titling. 2. Eclipse Falls is one of these communities.
36	1. Can the government assist in the drainage of farmland for agriculture and also to make a dam for the small students to go to school 2. A chainsaw is needed to assist in health and sanitation project. This is to build a trestle for ten (10) water tanks.	1. The government will see about the chainsaw
37	1. More consultations will help communities to understand the LCDS	1. The suggestion was noted
38	1. Health, education and transportation should improve with the LCDS 2. Land title was requested but no acknowledgement letter has been received.	1. The Ministry of Amerindian Affairs will be in close communication with all communities that are eligible for titling.
39	1. An application was sent in September 2001 and to date nothing has been received from the MOAA. 2. The community has 400 persons and 70 households	1. This area is a mixed location hence a closer investigation is needed.
40	1. Wants the village to be legally titled and to be respected by miners.	
41	1. The village held a consultation on the LCDS on 19 <sup>th</sup> July, 2009. 2. LCDS is a great vision	1. Benefit sharing: The community will have to determine how the money will be spent. 2. The value of the forest will be approximately the same as

	<ul style="list-style-type: none"> <li>3. What are some of the conditions of the LCDS</li> <li>4. <b>Valuing the forest:</b> Will the Amerindian communities forest have the same rate as State Forest</li> <li>5. How will the benefits filter down to the members of the community</li> <li>6. How many years do we have to be committed e.g. 25, 50 or 99 years?</li> </ul>	<p>State Land</p> <ul style="list-style-type: none"> <li>3. Adjustments /conditions needed: Not much changes because the forest is intact. The community just needs to ensure that the forest is not least out of clear felling or major deforestation activities</li> </ul>
42	<ul style="list-style-type: none"> <li>1. Is the same calculations being used for state lands and communal lands</li> <li>2. Will you have to tell the international community every time a community opts in?</li> <li>3. Will an indigenous bank be needed?</li> </ul>	<ul style="list-style-type: none"> <li>1. There be a lag from when the community opts in and when the benefits are received</li> <li>2. An indigenous bank is not needed however the community must select a sound bank and develop an account for fund received.</li> <li>3. No concession will be granted to trade carbon</li> </ul>
43	<ul style="list-style-type: none"> <li>1. Commends the president on the LCDS</li> <li>2. In Hururu logging is the main activity. What are consistent rules outline in the handout?</li> <li>3. Emphasis should also be placed on replanting trees like crab wood where the lumber and the oil can be utilized.</li> </ul>	<ul style="list-style-type: none"> <li>1. Current standards for the Guyana Forestry Commission are the standards for the LCDS</li> </ul>

H. E Bharrat Jagdeo  
President of the Cooperative Republic of Guyana

Dear President,

**SUPPORT ON LOW CARBON DEVELOPMENT STRATEGY**

Following on consultation process on Guyana’s Low carbon Development Strategy in Region 9, I had convened a village general meeting in Quarrie on the LCDS.

The villagers were very supportive of the strategy and have asked me as their elected Senior Councilor to convey to you our full support and hope that your agenda to address climate change can be successful.

We wish you well and hope the entire country rally behind you in this very noble task that you have set for the country.

Good Luck

Yours cooperative

.....

CHAVEZ FRANCIS

Senior Councillor

Quarrie Village

Declaration from the Community of Nappi in Region # 9

Tabled at the National Toshao's Conference in Georgetown

July 27<sup>th</sup> – 31<sup>st</sup>, 2009

We commend and welcome the convening of this National Toshao's Conference by the organizers The Government especially the Ministry of Amerindian Affairs.

Recognising that our lands are also being affected by climate change, impacts that threaten our way of life. We are committed to supporting a National Strategy that cultivates sustainable human development to reduce poverty, avoid deforestation and the destruction of our fragile forest and savannahs, one it ensures the equitable distribution of wealth through the wise use and management of our community's Natural Resource.

We the residents of the Nappi Community in Region # 9 having discussed the draft document on the Low Carbon Development Strategy presented at St. Ignatius Benab.

We wish to express our support for the proposal that aims to protect and maintain the health of our standing forests especially recognizing and ensuring that these initiatives fully respect and ensure that these initiatives fully respects and secure our indigenous Rights and values, our Traditional Knowledge and practices.

We look forward to playing a significant and meaning role in this process concerning the national position and in contribution to the efforts related to REDD, Global warming and Climate Change.

We wish to caution though that in doing this that the Government of Guyana through the Ministry of Amerindian Affairs must ensure that ALL our concerns are fully incorporated into the National Policies for climate change and the low carbon initiative.

Finally we are committed to the collective decision making guided by the principals of Transparency and Dialogue.

The honoured residents of Nappi.

Georgetown, Guyana

His Excellency President of  
The Republic of Guyana  
Bharrat Jagdeo

On Behalf of the villages of Kumu, we are proudly supporting the Low Carbon Development Strategy by signing in for the Low Carbon Development Strategy.

We are proud of you by taking this great milestone forward, it is like a beginning of a new era for us the indigenous people. As you have clearly stated that we the Amerindians have clearly stated that we the Amerindians have protected our forests for generations; This will still be protected for the future generations to come!

As we all realize that we are in a world of catastrophes, we have to give and take in what ever can lead in combating this hazards but we the villagers of Kumu is prepared for the expectations of the unexpected.

We are willing to part take in any decision you think is great for us by promoting economic development while at the same time combating climate change, we also look forward for job creating in the community by the government of Guyana, so that economic development can play a vital role in our indigenous communities by developing our communities and the whole of Guyana as we look for securing a brighter tomorrow.

We the villagers liked most the phrases you have stated that "Future generations will not forgive us if we fail to act despite knowing these facts," and that "The of Guyana are willing to act." We believe as Guyanese we should take this great lead forward by supporting the leader of our country and his mighty idea:-

A Low Carbon Development Strategy and Transforming Guyana's Economy while combating climate change.

Yours Respectfully  
Michael S Anderson  
(Village Secretary)
